Customer and installer feedback reveals excitement over the NEW Opal Wider Remote solution

*As seen
at the 2009
Sydney Fine Food
trade show!*

Finally there's a solution to your access problems. Williams have introduced an Opal under-counter fridge that has an increased service panel area to keep even the fussiest installer happy.

- Easy access with a generous 200mm wide access area (but only 40mm wider than the current Opal Remote!)
- Face mounted door hinges allows the easy choice of plinth mounting or legs
- Easy cleaning and draining with flexible access. Refrigerant piping access is at the front of the cabinet as is the drain spigot, however the flexibility of the new Opal wide remote also allows the rear to be accessed. If space is tight then an optional side access panel can be ordered.
- Practically any current cabinet controller can be fitted with a minimum of fuss due to the new service panel design.

HO2RW features

- HO2RW – 1210mm W x 875mm H (on legs) x 650mm D
- Storage temperature range of +1°C to +4°C
- 1/1 Gastronorm capacity (350 litre nett)
